A Recorded urine volumes in VitalDB, and the true volumes the model infers
digit preference: values
pile up on multiples of 50 mL
recorded values
the two values in B
true volumes (model)
rounded to 100 mL
rounded to 50 mL
read to 10 mL
read to 5 mL
records per 5 mL
urine volume (mL)
B What two recorded values mean: the PDF of the true volume, by how it was charted
recorded 100 mL
61–137 mL (95%)
recorded 260 mL
255–265 mL (95%)
PDF of the
true volume
urine volume (mL)
